

Getting started with **StellarWiFi**

- ✓ First you need to download the eero home WiFi system App via Google Play or the App Store.

- ✓ Create an account on the eero App. A verification code will be sent to you via email or SMS based on your preference.
- ✓ Put in the verification code received.
- ✓ Your eero account is now activated.

Setting up an eero Pod

- 1 Click on **Start**
- 2 Switch off the modem.
- 3 Connect the eero Pod to the modem through the ethernet cable provided and press **Next**
- 4 Switch on the eero Pod and the modem.

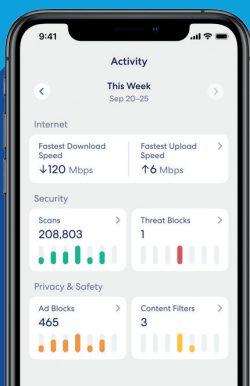

Configuring your eero Pod

- 1 **Accept location permission** to detect the eero's Pod location if requested.
- 2 Once the eero Pod is located, press **Next**
- 3 Choose the room where the Pod is located and press **Next**
- 4 Give your WiFi network a personalised name and put in a password of your choice. If you already had a WiFi network in place use the same name as before so that devices can connect automatically.
- 5 Give it a few seconds and voila your network is now created!
- 6 If you are **adding more than one eero Pod** or you have **replaced your eero Pod** choose **Add another eero** and follow step by step as the App guides you through the installation process. If you have just one Pod choose the option **No, I'm all set**.
- 7 Once done you have the option to connect the current mobile device to eero, press **Skip** or **Connect**

eero App Features

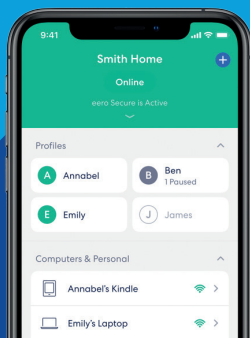

Seamlessly manage
every aspect
of your network

Use the eero App to:

- see what's happening on your network
- check connected devices and usage all the time
- run health check to diagnose and solve issues
- set schedules, create privacy profiles, or shut off your network
- share your WiFi and create guest networks

eero protects and secures the traffic flowing over your network through advanced encryption and security protocols.

eero App Security Features include:

- secure setup
- safe connection
- automatic updates
- network privacy
